International Survey on Family and Work Life, 2012, Norwegian Part of ISSP

| Overview | |
|--|--|
| Type | International Social Survey Program (ISSP), Norwegian part |
| Identification | NSD2002 |
| Version | Production Date: 2014-11-04 <u>Notes</u> Original data from Norwegian Social Science Data Service are documented and prepared, second NSD-version. |
| Series | ISSP develops and coordinates annual surveys in their member countries, and the topics for research are repeated at intervals of a few years. The "family and worklife" survey was conducted for the first time in Norway in 1994, and replicated in 2002. The objective of the surveys is to create an empirical foundation for studying family and worklife. |
| Abstract | |
| <p>This survey is conducted on the basis of the research work in "The International Social Survey Program" (ISSP). ISSP is an international organization where members develop and coordinate annual surveys, mainly in the fields of political science and sociology. The topics of the surveys vary, but topics are replicated every few years so that it is possible to measure the changes in patterns of behavior and attitudes over time and differences between countries and cultures.</p> <p>In 1989, the Norwegian Social Science Data Services (NSD) became member of the ISSP and NSD has since been responsible for conducting the survey in Norway.</p> <p>In 2012, the goal was to collect data on family and worklife.</p> | |
| Kind of Data | Survey data |
| Unit of Analysis | Individual |

| Scope & Coverage | |
|---|--|
| Keywords | Labour and employment, Working conditions, Conditions of employment, Occupations, Health, Social structure, Family roles, Politics, Social welfare |
| Topics | Labour and employment, Social stratification and groupings, Family life and marriage (including household composition and generations) |
| Time Period(s) | 2012 |
| Countries | Norway |
| Geographic Coverage | |
| Country | |
| Universe | |
| Persons residing in Norway in the ages of 18-79, in 2012. | |

| Primary Investigator(s) | Norwegian Social Science Data Service, NSD |
| Other Producer(s) | TNS Gallup |

Sampling

Sampling Procedure

The sample has consisted of 3800 units.

The primary sample was drawn from the Central Person Register as a simple, random sample of persons residing in Norway, in the age of 18-79 years. TNS Gallup sent out and registered the self-completion questionnaires. Respondents were also offered to answer on a web-based questionnaire developed by NSD. 709 of the respondents used the web survey.

Gross sample: 3800 persons

Net sample: 1444 persons

Response rate: 38%

Weighting

Not used in this study.

Data Collection

| | |
